

Major Loss Recovery - Complex & Technical

FRA, Major Complex and Technical Loss Recovery Experts

Disasters often strike when you least expect it, from a large fire, water damage or microbial contamination in a commercial HVAC system. The outcome from these events can be devastating to a property and the recovery process is often complex, requiring several different subject matter experts working collaboratively to bring the property back to a pre-loss condition. Communication and transparency with all stakeholders involved is crucial to the recovery process.

With an innovative approach to major loss, FRA has the resources and technologies to deliver a comprehensive restoration strategy. This can include:

- Dedicated response team with local and national resources.
- Rapid response, coordination of emergency make safe and mitigation.
- Initial inspection reporting live from site, suggested mitigation strategies, and photo documentation.
- Virtual assessments.
- Detailed routine reports and updates.
- Salvage options.
- Business interruption reduction strategies.
- Project planning and management.
- Detailed electronic inventory of loss.
- Comparative quoting.
- Restoration reserve.

By delivering on all of the above, FRA is able to provide you with a time efficient, valuable service delivered with accuracy.

With locations in Tasmania, Victoria, ACT, New South Wales and Queensland, FRA has the depth of resources and expertise to manage any size or complex project.
